First start-up of the AURATON Orion Set

To properly activate the AURATON ORION Set after installation, follow these steps:

- 1. Connect the power supply to the AURATON Orion R controller (transmitter)**
 - Connect the power supply to the socket in the controller housing, **or**
 - Insert the batteries into the controller, observing the polarity indicated in the battery compartment.
 - 2. Connect the power supply to the receiver (module next to the heating device)**
 - After connecting the power supply to the receiver, the set will automatically pair – the devices will connect without the need for additional configuration.
 - 3. Pair the set with the Tuya Smart app**
 - Open the Tuya Smart app on your smartphone.
- The device should be added automatically, or you can press the “+” button in the upper right corner.

IMPORTANT:

If you are using battery power with the AURATON Orion R controller, be sure to change the “B5” parameter to 20 minutes or more.

A detailed description of changing the B5 parameter can be found in the “Advanced Option B” section of the device’s user manual.
